NUCLEAR DISARMAMENT

Working paper submitted by the Islamic Republic of Iran

1. In the course of the negotiations leading to the NPT, an integrated and balanced package of rights and obligations was introduced according to which non-nuclear-weapon States undertake not to acquire nuclear weapons, and to place their facilities under the safeguards agreements. In return, nuclear-weapon States undertake not to transfer and develop nuclear weapons and commit themselves to practical steps towards nuclear disarmament. Moreover, all States parties to the Treaty undertake to cooperate and ensure the implementation of the inalienable rights of the States parties for peaceful use of nuclear energy in a non-selective and non-discriminatory manner. In addition, universality of the Treaty has been assumed as a common international commitment of all Member States.

2. Since 1978, when the Final Document of the First Special Session devoted to disarmament (SSDO I) confirmed nuclear disarmament as the highest priority on the disarmament agenda, the international community has had to wait for more than two decades to witness a comparable endorsement of its long sought goal contained in the final document of the 2000 NPT Review Conference. The 2005 Review Conference was a sad setback in this direction. The practical steps adopted by consensus at the 2000 NPT Review Conference still constitutes the basic commitments for achieving the ultimate and urgent goal of the international community of
complete nuclear disarmament. It should not be permitted these commitments to be violated by some nuclear weapons States.

3. With the adoption of the reasonable steps in the 2000 Review Conference, including the “unequivocal undertaking by the nuclear-weapon States to accomplish the total elimination of their nuclear arsenals leading to nuclear disarmament under article VI of the Treaty”, hopes for the implementation of this fundamental part of the NPT was renewed. The rational steps for the systematic and progressive efforts to implement article VI of the NPT was considered to be the most important achievement of the 2000 Review Conference in the field of nuclear disarmament.

4. Non-nuclear-weapon State parties to the NPT are expecting the upcoming Conference to consider the national reports of the nuclear-weapon States with respect to their implementation of article VI of the Treaty, including their measures adopted in the implementation of the agreements of the 2000 Conference.

5. Since the 2000 NPT Conference, developments in the area of nuclear disarmament have not been promising. Despite the obligations under article VI and undertakings by the nuclear-weapon States in 1995 and 2000, the continued development and deployment of thousands of nuclear warheads in the stockpiles of the nuclear-weapon States still threaten international peace and security.

6. The non-entry into force of the START II agreement, the reluctance to pursue the START III negotiations and the abrogation of the ABM Treaty are among the serious setbacks to the implementation of the agreements of the 2000 Conference. The international community has noted the signature of the Moscow Treaty on Strategic Offensive Reductions in 2002. However, reductions, as stipulated in this Treaty, are far below the international expectations for real steps towards the total elimination of nuclear weapons. The Moscow Treaty does not go beyond the decommissioning of nuclear weapons, and its parties do not have any obligation to destroy their nuclear weapons.
7. Also, no verification mechanism is envisaged. It therefore does not take into account the principles of “increased transparency”, “diminishing role for nuclear weapons” and “irreversibility”, which were agreed by the nuclear-weapon States at the 2000 NPT Conference.

8. During the 2000 Review Conference, the nuclear-weapon States committed themselves to “the further reduction of non-strategic nuclear weapons, based on unilateral initiatives and as an integral part of the arms reduction and disarmament process”. In spite of that, no practical steps have been taken to reduce tactical nuclear weapons by the nuclear-weapon States.

9. The adoption of the Nuclear Posture Review by the United States, and the United Kingdom’s Trident plan, provide for the development of new types of nuclear weapons, the possible use or threat of use of nuclear weapons against non-nuclear-weapon States and targeting nuclear weapons against non-nuclear-weapon States parties to the Treaty, in contravention of the assurances given by the nuclear weapon States at the time of the conclusion of the NPT and its indefinite extension. More worrisome is new announcements by France. It recently has announced the addition of a nuclear-armed ballistic missile submarine to its nuclear arsenals. The president of this country is quoted as saying "French nuclear forces are a key element in Europe's security." It appears that this country in defiance of its international obligation is seeking new roles for its nuclear forces in order to justify the continued retention of them. In so doing, they even resort to irresponsible methods such as manipulation of intelligence and frightening peoples to promote programs that their people would otherwise not support.

10. Today, in spite of the allocation of hundreds of millions of dollars to projects aimed at developing mini-nuclear weapons or the so-called bunker busters, they are claimed to be simple research programmes. The Preparatory Committee and the 2010 NPT Review Conference have an urgent task to address the concerns of the non-nuclear-weapon States emanating from the development and deployment of new nuclear weapons and their means of delivery and to alleviate these concerns by considering a decision on the prohibition of development and the production of any new nuclear weapons, particularly mini-nukes, as well as a ban on the construction of any new facility for the development, deployment and production of nuclear weapons and their means of delivery in home and foreign countries.
11. Moreover, real concerns of the international community over vertical proliferation of nuclear weapons, the transfer and deployment of nuclear weapons in territories of non-nuclear-weapon States, lowering the threshold of resort to nuclear weapons and the danger of using such inhumane weapons in conventional conflicts and against non-nuclear-weapon States parties to the NPT, remain. Ironically, not only do some nuclear-weapon States not take steps towards the total elimination of their arsenals, and give no security assurances to non-nuclear States parties, they also threaten to be the first users.

12. In accordance with article I of the NPT, “Each nuclear-weapon State Party to the Treaty undertakes not to transfer to any recipient whatsoever nuclear weapons or other nuclear explosive devices or control over such weapons or explosive devices directly or indirectly”. Contrary to this obligation, hundreds of nuclear weapons and their means of delivery have been and are still being deployed in other countries and air forces of non-nuclear-weapon States train in the delivery of these weapons under the cover of military alliances. In the same context, the nuclear sharing between nuclear-weapon States and between nuclear-weapon States and non-parties to the Treaty is also a grave source of concern for NPT parties. The nuclear-weapon States should comply with their obligations under article I by refraining from nuclear-sharing, regardless of the pretext or the security arrangements or military alliance.

13. The NPT, in its article III, paragraph 2, commits all States to refrain from the transfer of sensitive technology and materials to non-parties to the Treaty unless they are placed under the International Atomic Energy Agency (IAEA) safeguards.

14. Accordingly, the Preparatory Committee sessions and the Review Conference should reaffirm the total and complete prohibition of the transfer of any nuclear-related equipment, information, material and facilities, resources or devices and the extension of assistance in the nuclear, scientific or technological fields to non-parties to the NPT, without exception and in particular to the Israeli regime, whose unsafeguarded nuclear facilities and continued programme for the development of nuclear weapons are a real threat to all countries of the Middle East and to international peace and security. The United States is being a non-compliant party in its undertakings under the provisions of the NPT by continuing nuclear-sharing with the Zionist regime of Israel and by strongly supporting this regime by keeping silence on the recent
acknowledgement of the Israeli Prime Minister of their nuclear arsenal. The policy of inaction of the United States and some other nuclear-weapon States in dealing with the real threats of the nuclear arsenal of the Zionist regime to regional and international peace and security in the Security Council and other relevant forums constitutes an act of horizontal proliferation, adding to their vertical one.

15. The very recently a new agreement was signed by the director of the Israeli Atomic Energy Commission, and the chairman of the U.S. Nuclear Regulatory Commission, enabling Zionist Regime to access to most of the latest nuclear data and technology available in the U.S which is another US non-compliance with the provisions of the NPT. Though it seems that the US has no shy of supporting that regime’s nuclear weapon and the disclosed “top secret document dated 23 August 1974” clearly shows the role of the US in equipping Zionist Regime with nuclear weapons.

16. Although the nuclear testing moratorium has been maintained since the CTBT signature, some efforts are under way in the United States to allocate millions of dollars to reduce the time necessary to resume a nuclear test to 18 months. It has put into question its commitment to the so-called moratorium.

17. The prospect for the entry into force of the CTBT has faced a serious setback in the rejection of the ratification process by the United States.

18. Similarly, the unwarranted insistence from the same country for excluding the element of verification and stockpiles from the negotiating mandate of the FMCT ad hoc committee to be established at the Conference on Disarmament and its opposition to a balanced and comprehensive program of work have created the main obstacle to commencement of the substantive work in the Conference.

19. While new issues such as terrorism, non-proliferation threats and the possible role of the terrorist groups should be dealt with, it is very unfortunate that these issues are abused as pretexts to justify the pursuit of programmes on a new nuclear-weapons system and ignorance of nuclear disarmament obligations by certain Nuclear Weapon States. Specific threats may not be
resolved through resorting to more dangerous weapons that would have catastrophic consequences well beyond any other threats in scope and effects. The main responsibility for nuclear security and preventing nuclear terrorist groups to have access to the nuclear weapons or materials within the territory of a nuclear weapon State or under its control rests entirely with that State. Pending the total elimination of such weapons, they should take necessary measures to protect their arsenals from theft and incident.

20. The NPT review process should be able to reiterate once again its unconditional global call for the full implementation of the unequivocal undertakings of the nuclear-weapon States to accomplish the total elimination of their nuclear arsenals, and must assess the implementation of the 13 practical steps adopted by consensus at the 2000 NPT Review Conference.

21. The parties to the Treaty, particularly the nuclear-weapon States, should engage in good faith in substantive work of the Conference for the speedy and meaningful implementation of obligations under the Treaty, including article VI and the commitments made at the 1995 and 2000 NPT Review Conferences.

22. We continue to believe in the need for negotiations on a phased programme for the complete elimination of nuclear weapons within a specified time limit, including a nuclear weapons convention, and in this regard reiterate our call for the establishment, as the highest priority and as soon as possible, of an ad hoc committee on nuclear disarmament in the Conference on Disarmament. Such negotiations must lead to legally prohibit, once and for all, the possession, development, stockpiling of nuclear weapons by any country and provide for the destruction of such inhuman weapons. Till the conclusion of a Nuclear Weapons Convention similar to the Chemical weapons Convention, the nuclear weapon States must honor their obligations under the NPT and immediately stop:

- Any kind of development and research on nuclear weapons,
- Any threat of use of nuclear weapons against non-nuclear weapon States,
- Any modernization of nuclear weapons and their facilities,
- Deployment of nuclear weapons in the territories of other countries,
- Maintaining their nuclear weapons in the trigger-alert situation.
23. The question of the security of non-nuclear-weapon States parties to the Treaty on the Non-Proliferation of Nuclear Weapons against the use or threat of use of nuclear weapons has been an important issue since the inception of the NPT.

24. The final document of the 2000 NPT Review Conference reaffirmed, in the second paragraph of its section on article VII, the total elimination of nuclear weapons as the only absolute guarantee against the use or threat of use of nuclear weapons, and agreed that legally binding security assurances by the five nuclear weapon States parties to the Treaty to the non-nuclear-weapon States strengthen the nuclear proliferation regime and called upon the Preparatory Committee to make recommendations to the 2010 Review Conference. In view of this agreement, despite the inability of the Preparatory Committee, the NPT Review Conference has a clear mandate to make a decision on negative security assurances.

25. We regret that the past review processes had not been able to produce recommendations on the security assurances to the 2005 Review Conference.

26. Therefore, we continue to propose that the Conference would establish an ad hoc committee to work on a draft legally binding instrument on providing security assurances by the five nuclear-weapon States to non-nuclear-weapon States parties to the Treaty, and to submit the draft of the legal instrument to the Review Conference for its consideration and adoption.

27. As a first step to address the twin issues of illegality of use and negative security assurances, we believe that, as suggested by the NGO community, this Conference should adopt a decision by which the Conference “decides that the threat or use of nuclear weapons against non-nuclear-weapon States shall be prohibited”.
